FEDERAL ENERGY  
REGULATORY COMMISSION

Dear Magalie R. Salas,

This letter is to inform you of my position on the proposed liquefied natural gas facility in the Long Island Sound. The sound is a natural resource we cannot afford to endanger with such a facility. The sound as finally been returned to a somewhat safe state, since the protection efforts through the last couple of decades. This imaginary line dividing New York and Connecticut will not protect our resources and the people of this area. The LNG facility endangers the health and safety of Long Island Sound and should not be built.

I hope we are in agreement on this issue and look forward to a written response on your position.
